

João Victor Santos da Costa

EXPERIENCE

cafezinho

Trainee

Dec 2023 – Present

Remote

- **Front end Developer** Prototypes, develops, and fixes system functionalities.
- **Scrum Master** Facilitates meetings, such as planning and retrospective sessions, and ensures that the team follows agile practices. Defines and prioritizes the backlog, and is responsible for the product vision and feature approvals.
- **Tech Lead** Provides technical guidance to the team, approves Pull Requests (*PRs*), and ensures code quality and design system compliance.
- **Software Engineer** Manages the development team, defines task division, and ensures project delivery. Approves and reviews software artifacts.

ERP Vendas

Trainee

July 2022 – October 2022

Remote

- **Full Stack Developer** Bug fixing and tool development.

PROJECTS

CRUD API

Java, Spring, MySQL

July 2024

- Developed a REST API from scratch using Java with Spring Boot, leveraging MySQL for CRUD operations and Flyway for migrations.
- Standardized API controller responses, ensuring proper use of HTTP status codes, with custom exceptions and enums for response codes.
- Integrated Spring Security for authentication and access control, using JSON Web Token (JWT) for secure access management.
- Adhered to SOLID principles and Clean Code practices to ensure code readability and maintainability.

For more details, visit my GitHub repository: [GEM API](#).

Portfolio

React, Vite, CSS

July 2024

- Developed a portfolio website to showcase my projects and skills.
- Styled the site using CSS for a customized and responsive design.

For more details, visit my site: [Portfolio](#).

EDUCATION

Unopar

Currently studying the 5th semester of Software Engineering

Remote

Set. 2023 – present
