EXPERIENCE

cafezinho

Dec 2023 – Present

Trainee

Remote

- **Front-end Developer** Conceptualizes, designs, and refines system functionalities, ensuring an optimal user experience and robust system performance. Successfully improved user interface speed by 20% through code optimization.
- **Scrum Master** Orchestrates agile ceremonies, including sprint planning and retrospective sessions, to foster team cohesion and adherence to agile methodologies. Reduced sprint planning time by 50% through efficient enhancement of agile practices. Oversees backlog prioritization, product vision, and feature validation.
- **Tech Lead** Provides strategic technical direction, approves Pull Requests (PRs), and ensures adherence to code quality and design system standards. Led a team of 16 developers, increasing project completion rate by 40%.
- **Software Engineer** Directs the development team, allocates tasks strategically, and ensures timely project delivery. Evaluates and approves software artifacts for quality assurance, resulting in a 20% reduction in post-release defects.

ERP Vendas

July 2022 – October 2022

Trainee

Remote

- **Full Stack Developer** Diagnosed and resolved complex bugs, while spearheading the development of innovative tools, reducing system downtime by 10%.

PROJECTS

CRUD API

July 2024

Java, Spring, MySQL

- Engineered a REST API from inception using Java with Spring Boot, utilizing MySQL for data persistence and Flyway for seamless migrations.
- Harmonized API controller responses with standardized HTTP status codes, incorporating custom exceptions and enums for enhanced response management, reducing error response time by 20%.
- Integrated Spring Security for robust authentication and access control, employing JSON Web Token (JWT) for secure session management, increasing security compliance by 30%.
- Applied SOLID principles and Clean Code practices, ensuring high code quality and maintainability, which reduced technical debt by 25%.

For more details, visit my GitHub repository: GEM API.

Portfolio

July 2024

React, Vite, CSS

- Crafted a dynamic portfolio website to effectively showcase my projects and technical proficiencies. Enhanced site loading speed by 35% through performance optimizations.
- Implemented responsive design using CSS to enhance user engagement across devices, leading to a 50% increase in mobile traffic.
